

Many attributes growers report from using gypsum

- Sulfur value
- Soil balance
- Crop quality
- Root development and water efficiency
- Erosion, nutrient loss
- N-P-K efficiency
- Yield
- Soil compaction
- Increased microbes
- Reduce pH drop
- Plant moisture
- Nutrient cycling
- Calcium value

Doug Armstrong, Atchison, KS

- Raises corn, soybeans, wheat and cattle
- Applied GYPSOIL for first time in spring 2014
- Application rate of 1,500 lbs./A

Jim Kesler, Sabetha, KS

- Commercial hay producer, 300 acres alfalfa
- Applied GYPSOIL for first time in spring 2014

Vance Beebe, Colony, KS

- No-tiller, grows corn, soybeans, wheat and hay
- Applied GYPSOIL for first time in 2011
- Sees better soils structure – deeper soil profile
